HAYTER®

MAKERS OF THE FINEST MOWERS

MAKE MOWING A PLEASURE

1970 - 2020

50
YEARS
OF THE
HARRIER

FASHIONS COME AND FASHIONS GO

BUT ONE THING REMAINS CONSTANT

CELEBRATING 50 YEARS OF THE HAYTER® HARRIER®

For 50 years, the Harrier® lawnmower has been one of our most popular models, keeping in touch with changing lifestyles since 1970. The high-quality, high-performance lawnmower creates a beautifully cut and striped lawn, time after time.

Before the Harrier, the only way to get a perfectly striped lawn was with a cylinder mower with a rear roller. However, this was a very high maintenance way to cut grass and as the world and our lives became busier, it was clear that the cylinder lawnmower was becoming less practical to use.

The Hayter® Harrier was one of the first rotary bladed lawnmowers to feature a properly integrated heavy rear roller. The result was the ability to cut grass at almost any length down to an immaculate striped finish. What's more, the ability of the Harrier to cope on more undulating terrain quickly established it as a leading innovator of lawnmowing.

1970 - 2020
50
YEARS
OF THE
HARRIER

CUTTING-EDGE INNOVATION

Over the years, Hayter's Harrier has improved continuously to keep it at the top of its game. Key elements have remained the same since its initial design such as brilliant ergonomics and balance, to make it very manoeuvrable without sacrificing the weight needed to press a perfectly sharp stripe.

The rear roller of the Harrier has also seen its developments. What first began as a solid steel component that, in damper conditions, churned up the grass when turning, advanced to a split rear roller. Eventually, the rear roller became ribbed, a much more complicated moulding process, but one that added brilliant traction on ever more undulating gardens.

A MARKET LEADER FOR HALF A CENTURY AND BEYOND

Into the future, the Harrier will benefit from a brand new lithium-ion battery power option. For those who want all the Harrier perfection without fuel, fumes or cables, it'll make mowing even more of a pleasure.

50 years after its invention, the Harrier remains one of the finest lawnmowers money can buy. Still manufactured in our Hertfordshire factory, the Harrier remains an icon of British engineering.

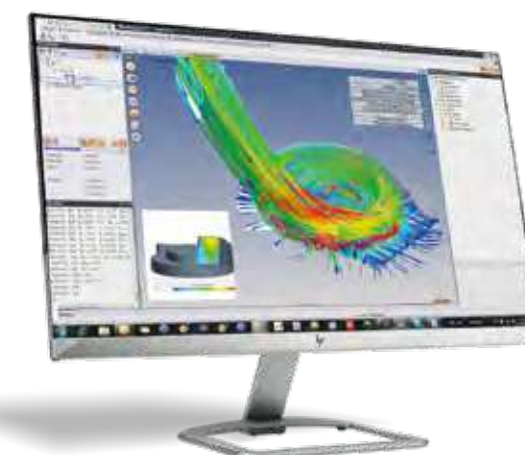

One thing is for sure, a perfectly mowed lawn will never go out of style.

ONE OF THE WORLD'S FINEST LAWNMOWERS

Hayter lawnmowers are designed with one goal in mind – to make mowing a pleasure. As pioneers of the rotary mower over 70 years ago, we pride ourselves on constant development and improvement. The year 2020 sees us celebrating 50 years of the Harrier® lawnmower, one of our most popular models that has seen consistent improvements ever since its invention half a century ago. The Harrier lawnmower was a turning point in grass cutting technology as it was one of the first rotary bladed lawnmowers with the ability to cut grass at almost any length down to an immaculate striped finish.

We believe our products are the best in the world, our customers do too. Looked after, a Hayter lawnmower will last a lifetime – although many of our customers upgrade as our technology advances. They stay with the Hayter brand because once you've owned the best, it's hard to go back.

ADVANCED BRITISH ENGINEERING

The design engineers at Hayter combine the latest in computer aided technology with traditional craftsmanship. Making mowing a pleasure is about ease of operation and outstanding cutting and collection performance. It's about ergonomics and weight distribution so even our largest lawnmowers are perfectly counterbalanced for better manoeuvrability. It's about having rear rollers in two sections that counter rotate on a turn to avoid churning your lawn, and about meticulous design and engineering to minimise noise and vibration in operation.

POWER, CONTROL AND TECHNOLOGY

The right power and torque is essential for effortless lawnmowing performance, which is why at Hayter we use engines made by Briggs & Stratton®, the World's largest producer of outdoor power equipment. Quality engineering provides consistent high power at low speed, at an unbelievably quiet operating volume.

instart*is*

To add even more pleasure to your mowing experience, and available as an option on Harrier 41, 48 and 56 lawnmowers, forget the pull-cord and switch to electric start instead.

The InStart® system provides up to 50 starts on a single 60 minute charge. Lithium-ion technology means it will hold its charge for several months too.

FIRST CLASS SERVICE AND AFTERCARE

When you own an exceptional lawnmower, you need exceptional care. That's why we offer an aftercare service that caters to the unique qualities of your Hayter. Our official Hayter specialists are passionate about our lawnmowers and will always use the very latest workshop equipment and technology to guarantee the longevity of your Hayter.

Our UK dealer network is carefully selected to ensure we have the best possible aftersales and service available to you. A regularly maintained Hayter will last a lifetime, so make the best use of your local dealer. If you move home and can't get to the dealer you originally purchased from, you can find another by visiting our dealer locator at www.hayter.co.uk.

OSPREY™ 46 CORDLESS

Introducing the brand new Hayter Lithium-ion 60V power system. The same convenience as your petrol lawnmower without emitting exhaust fumes into the environment. Featuring our clever Power-Boost technology which automatically adjusts power needs to suit changing demands, save energy and maximise run time.

Cutting width = 46cm.

60V

MAX

1400 maximum / 54V typical

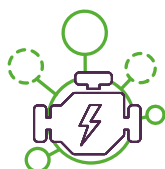

3300mAh

POWER HAND TOOLS

Our 60V Lithium-ion power pack is compatible with Toro's brilliant range of Flex-Force Power System™ garden tools.

FEATURES AND BENEFITS

60V max+ Green Series™ Power System

High power motor unit that's compatible with Toro's Flex-Force range of garden tools.

Lithium-ion battery

The freedom of cordless with no compromise on power.

Power-Boost

Auto-adjusts power to suit the length of the grass and cutting conditions.

Boost-Max

Set the power at the highest setting for even tougher conditions.

3 battery options

Choose from 3 battery power options according to the size of your lawn.

Self-propelled so you can simply walk behind and steer.

Easy-wash hose connector allows you to clean the underside of your mower without getting your hands dirty.

Collects autumn leaves – highest setting above the grass shreds and collects.

Steel cutting deck provides strength and durability.

Large capacity 55 litre grass bag can be removed/attached through the handlebar.

Easy push-button start gets you mowing faster.

MODEL OPTIONS

OSPREY 46 CORDLESS MOWER

Self-propelled so you can simply walk behind and steer. With a two speed transmission, choose from either 1.9mph or 2.2mph.

Model: CODE613A. Motor: Hayter 2.0 kW Brushless DC. Weight: 33kgs.

RECOMMENDED KIT

£599.99[‡]

INCLUDES:

- Hayter 6.0Ah 60V Battery
- Hayter 60V Charger Unit

MOWER ONLY

£325.00[‡]

TORO® BATTERY LEAF BLOWER

TOOL ONLY £99.00[‡]

This cordless leaf blower clears large piles of leaves in a snap. You have control at your fingertips with the variable-speed trigger, turbo-boost button, and cruise control.

Model: 51825T. Motor: Brushless DC. Weight: 3.4kgs.

TORO® BATTERY STRING TRIMMER

TOOL ONLY £125.00[‡]

Adapt this trimmer for any job with the variable speed trigger. The spoolless cutting system allows you to easily adjust the line size (2.0mm or 2.4mm) or cutting width (36cm or 41cm).

Model: 51835T. Motor: Brushless DC. Weight: 4.58 Kgs.

60V CHARGER UNIT

£49.99[‡]

Re-charge your battery with the charging station. Sold excluding battery.

Model: CODE120A

These high-performance tools from Toro are engineered to be easy to start, easy to use and easy to maintain and work perfectly with the Osprey 46 Green Series lawnmower.

A BATTERY FOR ANY APPLICATION

There are 3 battery size options to choose from - the same battery can be used across the Hayter Green Series and Toro Flex-Force Power Systems for added flexibility.

SPIRIT™ 41 ELECTRIC

With its revolutionary design, the Spirit™ 41 Electric is a compact, powerful and efficient electric lawnmower, delivering a fine Hayter® striped finish to any lawn.

Cutting width = 41cm.

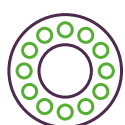

MADE IN BRITAIN

FEATURES AND BENEFITS

A ribbed rear roller creates perfectly sharp stripes.

Ball race bearings in the wheels for smooth running and longer life.

Powerful 1500w induction motor for quiet, smooth operation.

17m power lead for increased reach and is detachable for easy storage.

Seven height-of-cut settings between 15-65mm, controlled by a single counter-balanced lever for easy adjustment.

Electric motor built by ATB, leaders in modern induction motor design and manufacturing.

Comfortable full width **Operator Presence Control (OPC)** handlebar.

Tough, **high-impact ABS polymer underdeck** for improved collection and reduced noise.

Strong and lightweight **aluminium skeleton chassis** for all key mounting points including the motor, handlebar and wheels.

Front fins for improved cut quality and integral moulded lifting handle.

Folding handlebars reduces the storage space needed.

Collects autumn leaves - Highest setting above the grass, shreds and collects.

MODEL OPTION

PUSH £345.00†
