

solo®

THE BETTER CHOICE. SINCE 1948.
German quality sprayers and cut-off machines

Product Information Pressure Sprayers 211 / 212

The pressure sprayers SOLO 211 (5 l) and SOLO 212 (7 l) are comfortable, light and reliable general pressure sprayers -made in Germany- for the price and quality conscious private user.

For plant protection jobs primarily in the private sector and for the casual use in smaller areas around the house and the yard and for smaller to medium sized gardens.

Suitable for the application of approved plant protection chemicals and liquid fertilizers. Both models offer an excellent price-performance ratio

NEW

Reliable construction

- The robust container with a safe base shows an embossed fill level indicator and is made of UV stabilized polyethylene. The efficient pump with carrying handle is made of robust plastic material.
- The net weight of 1.2kg (model 211, 5 l) and 1.5kg (model 212, 7 l) has been kept on the low side.

Comfortable equipment

- With the 1.4 m long and 25 mm wide strap that can also be adjusted in length, the pressure sprayer is comfortably carried over the shoulder
- A very efficient and smooth to operate pump allows a quick and effective pressure build-up. The pump handle also serves as carrying handle
- The large and sturdy pump handle is made of resistant material and also serves as a wand holder for all available SOLO spray wands. The function of the handle is changed in no time from 'carrying' to 'pumping'
- The automatic pressure release valve limits the tank pressure for the safety of the operator. The pressure release valve is easily accessible and can also be manually operated to release all tank pressure when the job is finished, for example
- A robust hand valve with release lock allows comfortable, stress-free working
- The wand is made of a flexible, unbreakable as well as chemical resistant plastic material
- The tank shape features three feet to form a stable base

- The standard delivery includes a fine adjustable hollow cone nozzle
- Made in Germany: These pressure sprayers are completely made in Germany

Accessories

- An extensive attachment range is available for the pressure sprayers SOLO 211 and SOLO 212. Availability of spare parts for these models is guaranteed for years to come.

In private gardens with larger areas to be treated, the new SOLO pressure sprayers that can be carried over the shoulder are of invaluable assistance. Depending on the area, models with 5 litre or 7 litre capacity are available.

The new base models 211 and 212 are equipped with a highly efficient SOLO pump. The UV ray resistant and transparent containers are made for long life.

The comprehensive attachment range with extension tubes, spray covers and various nozzles for different requirements make the new, light SOLO pressure sprayers - made in Germany - even more versatile.
