

solo®

THE BETTER CHOICE. SINCE 1948.
German quality sprayers and cut-off machines

Product Information Waist Belt System **49598**

Product Features

- The waist belt system 49598 provides unsurpassed carrying comfort of the SOLO Battery Sprayer 442. It consists of generously padded back and side sections that perfectly support the hip and lumbar region. Wide, looped side straps can be individually adjusted to the required length and locked with a quick release system for a perfect fit.
- The SOLO Waist Belt System allows the weight transfer of a considerable portion of the overall machine weight from the shoulders to the hip region. This weight distribution further increases the excellent carrying comfort of the SOLO 442 Battery Sprayer.
- The linkup of this attachment waist belt system with the anatomically shaped rear section of the SOLO 442 and the high value padding of the shoulder belts provides a pleasant carrying feel similar to trekking backpacks.
- These advanced features support optimally and ergonomically more frequent and longer periods of operation with the SOLO 442. This is a huge advantage for comfort and safety at work that should not be underestimated.

Details

- Anatomically shaped and generously padded side sections and rear side with inner breathable material
- Water resistant qualities of the surface materials
- Wide and individually adjustable loop belts with large push lock
- Quickly and simply attached to the lower section of the machine
